Criteria —

Somateria mollissima breeds in coastal areas of north-west and northern Europe, which holds >50% of its global population. Its European breeding population is large (>840,000 pairs), and underwent a large increase between 1970–1990. Although there were small declines in Greenland and Svalbard during 1990–2000, the species was stable or increased across most of its European range, and underwent a small increase overall. Consequently, it is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Denmark	25,000 – 25,000	00–02	0	0–19	17
