Anas acuta NORTHERN PINTAIL

Criteria —

SPEC 3 (1994: 3) Status (Declining)
Criteria Moderate continuing decline
European IUCN Red List Category —
Criteria —
Global IUCN Red List Category —

Anas acuta is a widespread breeder in much of northern and parts of central Europe, which accounts for less than a quarter of its global breeding range. Its European breeding population is large (>320,000 pairs), but underwent a large decline between 1970–1990. Although it was stable or increased across much of its European range during 1990–2000, the stronghold population in Russia continued to decline, and the species underwent a moderate decline (>10%) overall. Consequently, it is provisionally evaluated as Declining.
